Pages L113-L118: L. Gao, K. J. Kim, J. R. Yankaskas, and H. J. Forman. "Abnormal glutathione transport in cystic fibrosis airway epithelia." The following data were incorrectly given. On page L115, the legend of Table 1

should read: Activity of GGT in CFT1-LCFSN (CFTR-transfected) cells was $112.8 \text{ pmol} \cdot \text{min}^{-1} \cdot \text{mg protein}^{-1}$. On page L115, the last line in the left column should read: . . . GGT activity decreased to $<11 \text{ pmol} \cdot \text{min}^{-1} \cdot \text{mg protein}^{-1}$ in all cells tested. On page L117, line 11 in the left column should read: . . . it would have required $\sim 1.3 \text{ h}$ to have degraded. . . .

Pages L625--L629: D. Meerzaman, P. X. Xing, and K. Chul Kim. "Construction and characterization of a chimeric receptor containing the cytoplasmic domain of MUC1 mucin." On page L628, line 2 in the left column should read: The bands appeared in both of the samples; however, the intensity of the upper band was much greater in the activated sample than in the unactivated sample (Fig. 4A, *lanes 3 and 2*, respectively).
